

Curriculum Intent, Implementation, Impact Statement

Intent

To be the best that we can be!

At Middlefield, we strive to:

- Equip all children with the confidence and capability to embody our school vision
- Deliver a 'knowledge-engaged curriculum' where skills are developed alongside knowledge and understanding
- Inspire children to engage fully in their learning with a broad, diverse spiral curriculum
- Enhance our curriculum by valuing outdoor learning and providing opportunities for all children to develop practical skills in the world around them
- Consider the wellbeing of our children as pivotal to their success and therefore tailor our curriculum to ensure that learners can feel safe and confident

Implementation

- Through consistently high standards of teaching across the school, providing effective learning opportunities
- Through our spiral curriculum, which revisits key concepts and learning points and dives deeper with each revisit
- Through a stimulating environment, encouraging the children to take notice of the spaces they work in and use the resources available to support and progress their learning
- Through a range of high-quality schemes to assist whole school planning, which enable staff to ensure progression
- Occasional one off events - visitors, themed days, trips out - which reinforce, enhance or progress children's understanding of the curriculum
- Subject leaders monitor their subject effectively through work scrutiny, pupil book study and discussions with staff
- Embed learning from the classroom through outdoor learning and forest school.

Impact

- Positive learning behaviours
- High levels of attendance and punctuality
- High outcomes - demonstrating skills, knowledge and understanding
- Equitable access to the curriculum for all learners, including those with additional learning needs
- Independent, resilient learners
- An appreciation of the world around them
